## DETAILED ACTION

### *Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-39, drawn to a method of delivering a polynucleotide to a parenchymal cell *in vivo*, classified in class 514, subclass 44.
- II. Claim 40, drawn to a device for applying pressure to mammalian skin for *in vivo* delivery of a polynucleotide to a parenchymal cell, classified in class 606, subclass 201.

The inventions are distinct, each from the other because of the following reasons: The method of delivering a polynucleotide to a parenchymal cell does not require the device in group II and the device of group II does not have to be used to deliver a polynucleotide to a parenchymal cell. The groups require distinct and separate searches which would be undue for the examiner. The method is used to treat or prevent disease while the device may be used to deliver polynucleotides, proteins or other pharmaceutical compositions.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art as shown by their different classifications, the search required for Group I is not required for Group II and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
